

Vibey App

Aaron Sanchez

What is it

Vibey is a music app that knows how you feel and plays songs that fit your mood. Whether you're happy, stressed, or just chill, it's like having a playlist made by a friend who *gets* you.

You tell Vibey how you're feeling, or it senses it from your voice or typing, and then plays music that matches or gently changes your mood.

Inspirations- spotify, youtube music , Apple music

Feedback/ challenges

It's hard to tell how someone really feels. Mood Detection interface.

People like different music even when they feel the same.

Mixing feelings and data
